## GANTRY HOISTS

Our gantry hoists have been designed and built to the upmost reliability and with safety in mind.

The gantry is available for 300kg and 500kg beam hoists and can be fitted directly to ladder beams on the scaffold or can be supplied with gantry frame as shown provided with base bars, front foot protection and ballast boxes.

The hoist frames are provided with a positioning brake to hold the hoist in a fixed position while lifting. The safety of operation is assured by the upper limit switch which is standard on all models.
