GEDA 500ZZP RACK & PINION TRANSPORT PLATFORM

A versatile single mast rack and pinion transport platform, the smallest of the Geda fleet, it is best suited to sites with restricted space.

The hoist can either be used as materials only at 24m/min, or with the addition of a roof piece, it can be used to transport personnel at a speed of 12m/min.

An added bonus is the low pull value of the tie, which allows the unit to be tied to scaffold.

Each unit is equipped with an overload sensor and side protection rails on the unloading ramp for safety.

The standard platform is fitted as a double-entry cage (straight-through), or it can be fitted with a 3-way entry cage upon request.

TECHNICAL SPECIFICATIONS

Max carrying capacity	500kg / 3 person 850kg / 5 person
Average lifting speed	Material mode - 24m/min Passenger mode – 12m/min
Power requirement	3 phase and neutral 415 volt 32 amp (pp)
Max. working height	100m
Platform dimensions	1.60 x 1.40 x 1.10/1.80m
Weight of base unit	740kg
Weight of mast section	40kg

**Two models are available: 500kg/3 person
850kg/5 person**
